

TestCase

```
classDiagram
    class TestCase
    class Rect["test.model.rect_test.Rect"]
    Rect --|> TestCase
```

The diagram illustrates a class hierarchy. At the top is a box labeled 'TestCase'. Below it is a larger, shaded box labeled 'test.model.rect_test.Rect' and 'TestCase'. A blue arrow points from the shaded box up to the 'TestCase' box, indicating that 'test.model.rect_test.Rect' inherits from 'TestCase'.

test.model.rect_test.Rect
